SUMMARY

EXPERIENCE

penetration testing

After graduating in IT, I've spent a lot of time honing my skills in cybersecurity and web penetration testing. I have a hands-on approach to identifying flaws and exploiting them ethically to help companies stay secure. I'm comfortable working across the whole stack—from the UI to the backend logic—which helps me understand exactly where things might go wrong. Since I'm also a Full-Stack Developer, I make sure that everything I build follows secure coding practices from day one, rather than just treating security as an afterthought

EDUCATION

Information Technology (IT) ↗

University of Science and Technology

Bachelor's Degree

I obtained a Bachelor's degree from the University of Science and Technology in the academic year 2025-2026, graduating with honors. During my studies, I participated in numerous training workshops organized by the university and completed my graduation project with a grade of excellence. The project involved developing a tool that helps regular users regain access to their devices when they forget their passwords.

SKILLS

A deep understanding of web application architecture.

Expert

Managing databases and handling queries efficiently.

Intermediate

Designing and building user interfaces and connecting them to the backend.

Intermediate

Full-stack web development

Advanced

Finding and exploiting flaws using professional methodologies.

Advanced

Web penetration testing and vulnerability analysis

Advanced
